☎️ (+98)9226907483

🌐 parniamaroofi.github.io

📍 Tehran, Iran

## Profile Summary

I am a graduate of computer software engineering and have a strong passion for front-end development. In my role as a front-end developer, I am responsible to develop responsive landing pages, web applications, and admin panels using technologies such as Vue.js/Nuxt.js, Vuetify, TailwindCss, Axios and occasionally Socket.io/Websocket. Learning new technologies and updating my knowledge is my work pattern. Being responsible and reliable and having a sense of humor along with taking work seriously are qualities that I always try to keep in myself.

## Work Experience

### Front-End Developer
